R-rule: when an 'R' followed by a vowel, the 'Rómen'  tengwa is used.

When a consonant follow the R, 'Óre'  tengwa is used. This usage mode is the same as in sindarin and quenya.

Tehtar placement rule: the tehtar signs full value vowel (a,á,e,é,i,í,o,ó,ö,ő,u,ú,ü,ű, but not y) is written above the following tengwa.

The Y tehta() is written below the palatized tengwa.

Y-rule: when Y is consonant, like in "yoke" or "year", we used the following:  to sign the Y consonant. When Y stands for *palatization* of consonant, we write simply a -tehta under the palatized consonant (or inside, if it is a Lambe). Finally, **vowel Y** is marked with a -tehta above a tengwa or a short carrier, just like any other tengwa-tehta combination. (In Hungarian there is no long ý vowel.)
